

REMARKS

Claims 1-37 were originally pending in this application. After two restrictions, claims 1, 15, 18, 19, and 25 are currently pending. The Office has objected to figures 7, 9, and 10 of the drawings because they fail to show capacitor 300. The Office has also rejected claim 1 under 35 USC § 102(b) as being anticipated by Henderson (U.S. Pat. 4,777,718). Claims 18 and 19 have been rejected under 35 USC § 103(a) as being unpatentable over Henderson in view Chakravorty (U.S. Pat. 6,611,419). The Office also stated the allowability of claims 15 and 25 if rewritten in independent form. This is a non-final Office action and is responsive to Applicant's communication filed on December 23, 2004.

Amendments to the Specification

Applicant asked that the amendments to the specification be entered into this application. In paragraphs 42 and 43 of the specification, references are made to element 320, located in Fig. 6. Element 320 does not exist. Applicant has amended the specification so that references to element 320 now reference element 324.

Amendments to the Drawings

Applicant has submitted formal drawings to replace the informal drawings and corrected Figures 6, 7, 9, and 10 by adding reference number 300 to each figure. The Office objected to drawings 7, 9, and 10 because reference number 300 had been omitted. Applicant found that Figure 6 was also missing reference number 300 and made the appropriate correction. Applicant asks that the formal drawings with corrections be entered into this application.

Allowable Claims 15 and 25

Applicant has rewritten these claims in independent form and canceled claims 1, 18, and 19.

CONCLUSION

Applicant asks that the Office reconsider this application and allow all pending claims. Please charge any fees that might be due, excluding the issue fee, to deposit account 14-0225.

Respectfully submitted,

Date: August 15, 2005
